III. Basic Layout Management

7. Develop an Android application using LinearLayout (Horizontal and Vertical) to design structured UI.

```
<?xml version="1.0" encoding="utf-8"?>
<LinearLayout
   xmlns:android="http://schemas.android.com/apk/res/android"
   android:id="@+id/main"
   android:layout_width="match_parent"
   android:layout_height="match_parent"
   android:orientation="vertical"
   android:padding="20dp">
   <!-- Title -->
   <TextView
       android:layout_width="wrap_content"
       android:layout_height="wrap_content"
       android:text="Student Registration" android:textSize="26sp"
       android:textStyle="bold"
       android:layout_gravity="center" android:layout_marginBottom="20dp"/>
   <!--Vertical Layout Components -->
   <EditText
       android:id="@+id/etName"
       android:layout_width="match_parent"
       android:layout_height="wrap_content"
       android:hint="Enter Name"
       android:layout_marginBottom="10dp"/>
```

```
<EditText

    android:id="@+id/etEmail"

    android:layout_width="match_parent"

    android:layout_height="wrap_content"

    android:hint="Enter Email"

    android:layout_marginBottom="20dp"/>

<!-- Horizontal LinearLayout -->

<LinearLayout

    android:layout_width="match_parent"

    android:layout_height="wrap_content"

    android:orientation="horizontal"

    android:gravity="center">

    <Button

        android:id="@+id/btnSubmit"

        android:layout_width="wrap_content"

        android:layout_height="wrap_content"

        android:text="Submit"/>

    <Button

        android:id="@+id/btnReset"

        android:layout_width="wrap_content"

        android:layout_height="wrap_content"

        android:text="Reset"

        android:layout_marginStart="20dp"/>

</LinearLayout>
```

```
</LinearLayout>
```
